Bio

I am a Vulnerability Research Lead at Binarly, where I work at the intersection of static and dynamic analysis techniques to help secure the UEFI ecosystem.

Previously, I was a postdoctoral researcher working with Giovanni Vigna and Christopher Kruegel in the SecLab at UC Santa Barbara. My current research interests focus on different aspects of systems security: automated vulnerability discovery, human-assisted cyber reasoning systems, and malware analysis are all topics that spark my curiosity.

I earned a Ph.D at EURECOM, where I was advised by Davide Balzarotti. Among other things, we investigated how non-atomic acquisitions impact the consistency of memory dumps, how to discover and to assess the quality of memory forensics heuristics, and how to automatically generate profiles for memory forensics.

When I am away from keyboard, I enjoy hiking, rock climbing, surfing, and playing chess.

Experience

Vulnerability Research Lead *Jun 2024-Present*
Binarly

Principal Research Scientist *Mar 2023-Jun 2024*
Binarly

Postdoctoral Researcher *Jan 2020-Mar 2023*
University of California, Santa Barbara, US

Doctor in Philosophy (PhD) *Jan 2016-Sept 2019*
Eurecom, France
Thesis: Advances in Memory Forensics

Education

MSc in Computer Science *Feb 2013-Oct 2015*
Universitá degli Studi di Milano, Italy
Thesis: Defeating Return Oriented Programming Attacks Using Program Analysis Techniques
Graduated with a final grade of 110/110 cum laude

Internship *Feb 2015-May 2015*
Eurecom, France

Erasmus *Jan 2014-Jun 2014*
Uppsala University, Sweden

BSc in Computer Science *Sep 2009-Feb 2013*
Universitá degli Studi di Milano, Italy
Thesis: When Hardware Meets Software: A Bulletproof Solution to Forensic Memory Acquisition
Graduated with a final grade of 107/110

Teaching Experience

Lecture on Memory Forensics (Cybercrime and Computer Forensics) *Apr. 2019*
Eurecom, France

Lecture on Python Optimization and Integration (Software Development) *Dec. 2018*
Eurecom, France

Lecture on Memory Forensics (Cybercrime and Computer Forensics) *May 2018*
Eurecom, France

Lecture on Python Optimization and Integration (Software Development) *Dec. 2017*
Eurecom, France

Lecture on Python Optimization and Integration (Software Development) *Dec. 2016*
Eurecom, France

Computer Programming - Teaching Assistant *Sept. 2014 - Feb. 2015*
Universitá degli Studi di Milano, Italy

Hacking Competitions

I am part of Shellphish, and I helped with the organization of iCTF 2021 and Decompetition V1 and V2.

I am also a core member of the NOPS team. As a team, we qualified twice for the CSAW Europe Finals (with a 2nd place in 2017) and we **won** hxp CTF 2018.
